Prospectus Spec. Cert. BM

Introduction

A warm welcome from the International Society for Bioregulatory Medicine specialisation programme, by Course Principal Dr D A Shakambet and Course Director Dr Tatyana Bosh

It gives us great pleasure to introduce joint Australian and International Societies specialist programme for Bioregulatory Medicine, and to offer you the Diploma specialist course in the study of Bioregulatory Medicine.

This is the only course that is board certified by the Specialist Board of Bioregulatory medicine of the International Society for Bioregulatory Medicine, which maintains the same standards of Training and Competencies worldwide. The specialist register in Australia is open only to those who complete this programme and pass the specialist exam. Graduates will become board registered specialists or consultants in the Bioregulatory field of medicine.

This course is a result of years of research in the field of system medicine based on the psycho-neuro-immunology and ground-regulating systems, so that bioregulatory therapies are combined into an all systems therapy, with objectives to create responsive autoregulatory homeostasis.

Self-regulation is induced at cellular and matrix function in conjunction with higher systems and Bioregulatory Medicine reactivates redundant informational pathways by methodology based on clinical detoxification, alkalinisation, microcirculation, neuro-vegetative and psychosomatic treatment, as a systems based integrative medicine towards treatment for chronic and degenerative diseases.

The International Society for Bioregulatory Medicine (Foundation for Bioregulatory Medicine) is a medical research and education charity founded in 1996 in London. The Foundation runs specialist programme in Bioregulatory Medicine by the International Society for Bioregulatory Medicine that organises courses in the UK and worldwide, in cooperation with national societies by its international team of doctors and lecturers led by the founders of the Bioregulatory Medicine, who have been refining this specialist programme.

Prospectus Spec. Cert. BM ¹

Introduction

The Course is presented by the International and Australian Societies for Bioregulatory Medicine, which delivers courses under the auspices of the International Society for Bioregulatory Medicine from London, United Kingdom and Specialist Board for Bioregulatory medicine.

The 'Bio-regulatory Medicine' course is presented by a team of Physicians experienced in the theory and practice of non-suppressive medicine. The course enables prospective students to gain knowledge in the theory and clinical practice of Bioregulation and modern homeotherapeutics and nutraceuticals.

The Syllabus is a response to the need for medical training that would meet new disease distribution. Bioregulatory medicine is arising as a need for ageing populations and new toxic environmental factors, with a prevalence of chronic and degenerative disorders, and ever-increasing incidence of malignant diseases.

Contrary to the therapy based on singular aetiological cause (reductionist view), the bioregulatory treatment aims to restore multiple homeostasis systems, and treats a disease as an imbalance of the homeostasis within the biological systems. Homeostasis is a dynamic, adaptive, and automated feedback mechanism, with a capacity to set off healing potential of the human organism.

This methodology observes health as a dynamic process in time and space, organised as an open feedback system. Bioregulatory medicine diagnoses imbalance at every level, be it physical, psychological or spiritual, in order to enable bioinformation flow.

This course teaches Environmental medicine and ways of regulating homeostasis by removing underlying tissue micro-toxicity. Non-suppressive treatment is facilitated by means of a bio-regulatory approach, combining Clinical Ecology, Nutrition, Bioenergy, Homeopathy, Bioresonance and Psychosomatic treatments. The therapeutic potential of homeopathy is utilised as Nanopharmaceuticals, targeting faulty homeostatic feedback loops and re-establishing its original informational flow.

Prospectus Spec. Cert. BM ²

Background Information

Academic Board consists of International team of Doctors, who are lecturers and tutors. The teaching centre is 'Australian Society for Bioregulatory Medicine', which is attached to the 'International Society for Bioregulatory Medicine', and Specialist board of the Australian Society for Bioregulatory Medicine that board certifies specialists in the field of Bioregulatory Medicine.

Specialist Board in Bioregulatory Medicine

Prospectus Spec. Cert. BM 3

Course Aims and Objectives

The Course Syllabus contains an Integrative program of therapies that deals with multifactorial and multilevelled aspects of disease process. This Prospectus is focused on the Diploma in Bioregulatory medicine with adjuvant therapies.

The adjuvant therapies are integrated into a bioregulatory protocol of Clinical Ecology, Nutrition, Environmental medicine, Homeotherapeutics and Psycho-therapeutic disciplines.

This Prospectus outlines the course details of the Specialist Certification in Bioregulatory medicine with Homeotherapeutics (Spec. Cert. BMUK London and Australia).

The Course aims to provide a training 'in-house' with self-study and work assignments, containing sufficient 'need to know' subject material and practice methodology to enable successful candidates to prescribe their modality (therapeutic discipline) of Bio-regulatory medicine and Homeotherapeutics.

The prospective students will be able to practice Bioregulatory Medicine and prescribe Homeotherapeutics in a manner, which is as follows:

- ethical
- safe-minimal side effects
- effective
- best practice

To provide teaching facilities for candidates to achieve Australian and United Kingdom practice standards to enable them to be accepted on to the Specialist Register and other medical Registers in the UK and Australia (i.e. register for natural & complementary medicine UK, Australia Specialist Register for BM)

To teach students sufficient Bio-regulatory Medical Sciences, Complex Homeopathy, Homotoxicology, all known as a Homeotherapeutics, in addition to General Diagnostics to ensure the above aims

To provide adjunct ancillary reading resources, work assignment and adequate standards of assigned case history to bring learning and attainment within the guidelines as laid down by the National Occupational Standards for the self-regulating body

Training standards and Competencies

Bioregulatory Medicine Training Standards

Standards of Competencies and Specialisation are regulated by the Specialist Board at ISBM (SBBM) that sets specialisation standards in Bioregulatory Medicine, required towards joining specialist registers of affiliated national Societies for Bioregulatory Medicine.

- To receive adequate structured 'in-house' and guided 'Self-study' teaching, and supported Learning Guidelines in covering the syllabus parameters to achieve the aims of the Course
- To be aware of tutor support facilities, administrative support facilities and their easy and regular availability; each student will have a designated 'Personal Tutor'
- To receive comprehensive teaching in a consistent style of approach, with continuous assessment procedures, together with attainment monitoring, and total guidelines of subject knowledge, methodology and 'need to know' parameters
- Specialist training lasts one year of combined theory and practical application of bioregulatory modalities, according to the educational programme set by SBBM (programme is continually updated with new research in the field)
- Required standard to all national register thus warrant continual professional education and maintaining high level of practice for bioregulatory specialists within the specialist register.
- Requirements for taking the specialist course are outlined in the curriculum document, comprising previous medical undergraduate education; medical or veterinary doctors, naturopathic doctors or complementary practitioners with long experience in the complementary field leading to approval by the national society register for undertaking specialisation.

Prospectus Spec. Cert. BM⁵

Training Standards and Competencies

- Specialisation is completed by passing board certified exam and thesis that is implemented by national register in cooperation and supervision by the SBBM, which issues a final specialist certificate as a requirement to join the specialist register of a national body

Bioregulatory Medicine Specialist Competencies

- Taking complete bioregulatory anamnesis of correlative psycho-mental and physiological systems signs of imbalance (dis-ease)
- Diagnostic parameters according to progress of disease process, and laboratory findings that reflect faulty homeostatic feedback system(s)
- Bioregulatory diagnosis requires a series of laboratory tests, as described in specialist coursebook, towards diagnosis of faulty homeostatic systems (basic blood tests, vitamins, minerals, antioxidants, allergy/sensitivity tests, hormonal, neurotransmitters profile tests and similar assessments)
- Bioregulatory therapeutical protocol is comprised according to the training programme, based on balancing higher and lower systems levels and removing systems' dysregulation factors.
- Bioregulatory competencies include treatment of detoxification, prescription of nutraceuticals, homeotherapeutics and adjuvant therapies as described in specialist coursebook
- Bioregulatory training competencies include bodywork techniques; psychosomatic bodywork and neurovegetative treatment
- Bioregulatory invasive treatments are subspecialist disciplines outside main programme, that include: segmental mesotherapy, dry needling and biopuncture
- Subspecialist invasive bioregulatory therapies, which require additional subspecialist training are depicted in Module 5 of post specialist continual professional training

Prospectus Spec. Cert. BM⁶

Training Standards and Competencies

Bioregulatory Medicine Specialisation Objectives

- Promote integrative, cost effective and gentle, causative treatment suited for prevalence of chronic, degenerative and malignant disorders of modern times
- To create training as a reflection of multi-levelled patients function, be it psychosomatic, bioenergetic-vitalistic, nutritional or environmental
- Update concept of linear and unifactorial ICD classification of disease, toward system-orientated multifactorial protocols
- Introduce systems biology and concept of probability of morbid parameters algorithm and introduce concept of dysregulatory factors in order to enable homeostatic self-regulation
- Update pharmacology with homeotherapeutical concept of minimal dosage, away from side-effect prone medication
- Substantially diminishes need for an aggressive type of pharmacological treatment and decrease its iatrogenic effects
- Introduce preventative and presomatic diagnosis and treatment in order to halt disease process at the early formative stages
- Diagnosis and treatment of unclassified medical conditions, with mixed clinical pictures
- Identifies subtle but cumulative environmental factors of disease, and introduce environmental medicine into main stream
- Complementary and conventional techniques merged into unified Integrated treatment within the personalised programme
- Reflective practice and continual professional development
- An understanding of patients' physical, emotional, bioenergetic and ever evolving inner awareness of spiritual needs
- Patients' opportunity to transform the illness crises into personal growth and balance

Prospectus Spec. Cert. BM ⁷

Course Methodology

Course Prerequisites

- a) Complete Application Form and forward fees
- b) Obtain obligatory textbooks
- c) Course Manual will be handed out at each course date
- d) Complete Background reading and precourse modules
- e) Commence reading, study and submit to Tutorial Desk the obligatory Work Assignments
- f) Attend all in house lectures, submit all Work Assignments and Case Histories by the due date as noted in each Course Manual
- g) Fulfill all obligations and submission of assignments and case management studies completion. The Examination entry form will be forwarded.

Course Manual

The Course Manual provides:

- a) Dates, timing and key summaries of all lectures
- b) Obligatory textbook and reference pages to lectures
- c) Addition to textbooks and lectures 'need to know' subject material
- d) Background reading parameters and guidelines
- e) Work Assignments and 'completion to standard' guidelines
- f) Case Management Studies - presentation parameters

Course Policy

Course Policy stipulates the obligatory aspects of the course described in the text hitherto; no sound recording or video recording allowed, no mobile phones; aim to arrive 5 minutes before lecture timings; work assignments submitted on due dates.

Prospectus Spec. Cert. BM⁸

Academic Resources

The Course provides training 'in-house' with self-study and work assignments, to enable successful candidates to practice Bioregulatory medicine at specialist level with capacity to prescribe Homeotherapeutics and seek out laboratory testings as described in Course handbook.

The course consists of modules, as described in the Course Syllabus of the Prospectus, which consists of the following:

-  In house lecture presented in modular units during the course of one academic year
-  10 course works, including cases studies, which constitute thesis, presented at the end of the course comprising 20,000 words
-  Self study and pre-reading material for the course
-  Distant tutorial arranged with their allocated tutor in and at the venue of the course
-  Final written exam with presentation of Dissertation (Thesis)
-  Continual Professional Development after graduation conducted by the International Society of Bioregulatory Medicine from London

Coursework

-  During the course, ten course-works are assigned. Each work consists of 2,000 words or 20,000 words in total. During completion of the coursework students are under guidance and supervision of the allocated tutor.

Thesis

-  Thesis is completed by aforementioned thesis made up of coursework assignments. Thesis consists of oral viva by public presentation, as a part of overall course assessment (see evaluation and exam).

Prospectus Dip.BMUK⁹

Evaluation and Exam

Examination Entry Parameters

Candidates must complete the examination entry form and submit it 28 days prior to the scheduled exam date. Entry to Examination is permitted only after the satisfactory completion of the course, including Work Assignments.

Qualifying Examination Parameters

■	Pass	60%
	Credit	70%
	Honours 2nd.	80% (1st class >91%)

Attendance and Course Work

■ Attendance, Course Work with Thesis attract 50% possible marks

■ The Examination attracts the balancing 50% marks

Completion of Course work and full attendance is obligatory. Re-sit students must undertake the whole examination after a minimum period of 3 months.

Qualification specialist title (Board certified Specialist, Consultant)

Qualification and Specialist Board is a part of the Australian Society for Bioregulatory Medicine, as an independent Board managed by the International Society for Bioregulatory Medicine that maintains Training standards and Competencies in Bioregulatory Medicine worldwide

■ Successful candidates gain Certification Specialisation (Spec. Cert BM), and are granted specialisation by the Specialist Board, and become eligible to join specialist registers in ASBM, ISBM and MBRCP .

Designation letters are: **MASBM board registered specialist (Aus.)**
MISBM board registered specialist (Intl.)

■ Following clinical years and evaluation by the Specialist Board, which holds discretionary right to award the Consultancy level of clinical excellence:
Designation letters are: **Consultant MASBM**

■ Specialist Board may also grant membership excellence based on the research, education and clinical practice, as well as honorary Fellowship of the Australian and International Societies: **FASBM, FISBM**

Prospectus Spec. Cert. BM¹⁰

Evaluation and Exam

Exam

Evaluation consists of Exam papers and completion and public presentation of Thesis.

The Exam consists of two parts; first part is made up of two essays and second part consists of short answers type of exam paper.

Part one - essay type answers (25% of total marks)

Two questions are to be answered in 2 hours

- a) 1 question – Bioregulation/Homeostasis (choice of two questions)
- b) 1 question - Homeotherapeutics (choice of two questions)

Part two - short type answers (25% of total marks)

Questions to be answered in a duration of 1 hour and 15 minutes

- a) short answer questions (20)

Part three - Course work and Thesis (50% of total marks)

The Dissertation is a text of course work of 20,000 words, in addition to the public presentation

Prospectus ¹¹ Spec. Cert. BM

General Informations: Dates

Course Dates

The course runs in precourse module one and four specialist modules; Each module lasts five in-house days of teaching and practicals.

The course also consists of webinars, between in house modules and tutorial for coursework.

The final exam and evaluation is scheduled after completed modular programme .

Module	Course dates 2016	
One	30 hours of ASBRM approved study	precourse programme of seminars 2015-2016
Two	Lecture & <i>clinical practice</i>	27-30 January 2016 VIC, 5 Days
Three		20-24 April 2016 QLD, 5 Days
Four		20-24 July 2016 QLD, 5 Days
Five		26-30 October 2016 VIC, 5 Days
		Total 190 hours
ASSESSMENT	Dissertation presentation Exam	30 October 2016

Prospectus Spec. Cert. BM 12

General Information: Timetable and Applications

Module Timetable

Each teaching days is divided into four sessions, with short break in between, and lunch break between 13:00 and 14:00.

Session I	tea break	session II
10:00 – 11:15	11:15-11:30	11:30 - 13:00
lunch break 13:00 - 14:00		
Session III	tea break	session IV
14:00 – 15:30	15:30-15:45	15:45-17:00

Applications are now being invited for the specialist Postgraduate Course Membership Programme.

Successful applicants will be informed in writing about the Course place, precourse reading and in some cases an interview will be arranged to guide student, prior to the Course commencement.

To apply for the Course, please fill in the application form that can be downloaded from the ASBM (www.asbrm.com.au) or ISBM website (www.bioregmed.com) or in the last page of the Prospectus and send it to ASBRM registrar together with:

- a) Your curriculum vitae including relevant professional development undertaken
- b) Application Form and
- c) Course Fee

Any deposit payment will be fully reimbursed for unsuccessful applicants. If you are awarded a place and you enrolled to the Course, the Fee is refundable up to three months prior to the start of the course, less 10% administration fee.

Fill in application on the last page of the Syllabus and forward it with payment to the Registrar

Prospectus Spec. Cert. BM ¹³

Syllabus: Overview

Module 1		
Module one is combined seminars and CPD courses, organised by The Australian Society for Bioregulatory Medicine as a prerequisite for attendance of the specialist modules and final board exam		
lectures	Module 2	Clinical Practice
Fundamentals of Bioregulatory Medicine Biological Systems Theory and Homeostasis Psychosomatisation and Disease stage process Presomatic Phase of Disease process Detoxifying Systems (Diagnosis & Treatment) Bioregulation of the Skin, Hepatobiliary and Mucosal Systems Tissue Microcirculation		Principles of Bioregulatory Treatment Bioregulatory Anamnesis Introduction to Homeotherapeutics Microcirculation and pH enhancement protocol Bioregulatory Detoxification procedures Psychosomatic Bodywork - Part One Psychoneurovegetative Practicals
lectures	Module 3	Clinical Practice
Bioregulatory treatment of Inflammation Phase 'PNEI system feedback' Bioregulation of the Psychoneurologic, Immune and Endocrine Systems Bioregulation of the Inflammatory Conditions Immunomodulation of Allergic and Autoimmune Conditions		Psychosomatic applied PNEI treatment Therapeutic rapport and Patient Management Clinical Hypnosis and neurolinguistic programming Dry needling and biological meridians - Part One Bioregulatory Detoxifying Nutritional protocols Manual Lymphatic Drainage Homeotherapeutics in Inflammatory conditions Psychovegetative treatment - Part One
lectures	Module 4	Clinical Practice
Bioregulatory treatment of Degeneration Phase Treatment principles of Degenerative Conditions Management of chronic Digestive, Respiratory and Urogenital disorders Gynaecological and Cardiovascular Degenerative disorders		Psychosomatic treatment at Soft Tissue level Psychosomatic Bodywork - Part Two Visceral and fascial practicals Homeotherapeutics in Degenerative conditions Bioregulatory Nutrition and Antioxidant Therapy Acupressure and Dry needling - Part Two
lectures	Module 5	Clinical Practice
Bioregulatory Treatment of Malignant Phase Specialised Bioregulation Oncology Treatment & Prevention Disorders of Musculoskeletal and Connective Systems Revision		Specialised Bioregulatory techniques Bioenergetics and Somatoemotional release Acupressure and Dry needling - Part Two Bioregulatory Ophtalmology and Dentistry Psychovegetative treatment - Part Two Homeotherapeutics in Malignancy Treatment protocols and strategies
Specialist Exam and Thesis		

Syllabus: Module One

Aims of Module One
To expand medical pathophysiology to the scientific basis of Homeostasis and Systems theory
To understand process oriented and system approach of ethiopathogenesis in a context of homeostatic autoregulatory feedback mechanism
To clinically apply nanopharmaceuticals and detoxifying therapies
Understanding of the Bioregulatory protocols and Somato-Psycho-Energetic process

Curriculum Module 1	
Systems Theory in medicine Chronological stages of Disease evolution Presomatic Syndromes Psychosomatic Process 'Hippocrates to Hahnemann' and Homeotherapeutical prescription Present day Nanoscience - theory of minimal dosage (Classical and PNEI)	Biofeedback mechanism in reference to spiritual, mental-emotional inference to health and pathology Non-linear thermodynamics, and multifactorial algorithm as a probability of disease and cure Bioregulation of the lower ground systems: Tissue Acidity and Microcirculation Bioregulatory therapy and diagnostics of the Mucosal detoxifying systems
Clinical Module 1	
Bioregulatory Diagnostic procedures on different levels: psycho-neuro-immuno-endocrine and electro-magnetic cellular communication (electrophysiology) Taking patient Bioregulatory medical history in unison between disease progression and psychological vitalistic anamnesis Applied Bioregulation and Patients Management; creation of the Bioregulatory medical treatment Protocols Bioregulatory detoxifying procedures and maintaining homeostasis parameters (matrix pH, microcirculation, vegetative neurovascular parameters)	

Prospectus Spec. Cert. BM¹⁴

Syllabus: Module Two

Aims of Module Two

- To expand medical pathophysiology to the scientific basis of Homeostasis and Systems theory
- To understand process oriented and system approach of ethiopathogenesis in a context of homeostatic autoregulatory feedback mechanism
- To clinically apply nanopharmaceuticals and detoxifying therapies
- Understanding of the Bioregulatory protocols and Somato-Psycho-Energetic process

Curriculum Module 2

Systems Theory in medicine
 Chronological stages of Disease evolution
 Presomatic Syndromes
 Psychosomatic Process
 'Hippocrates to Hahnemann' and Homeotherapeutical prescription
 Present day Nanoscience - theory of minimal dosage (Classical and PNEI)

Biofeedback mechanism in reference to spiritual, mental-emotional inference to health and pathology

Non-linear thermodynamics, and multifactorial algorithm as a probability of disease and cure

Bioregulation of the lower ground systems: Tissue Acidity and Microcirculation

Bioregulatory therapy and diagnostics of the Mucosal detoxifying systems

Clinical Module 2

Bioregulatory Diagnostic procedures on different levels: psycho-neuro-immuno-endocrine and electro-magnetic cellular communication (electrophysiology)

Taking patient Bioregulatory medical history in unison between disease progression and psychological vitalistic anamnesis

Applied Bioregulation and Patient Management; creation of the Bioregulatory medical treatment Protocols

Bioregulatory detoxifying procedures and maintaining homeostasis parameters (matrix pH, microcirculation, vegetative neurovascular parameters)

Prospectus Spec. Cert. BM ¹⁵

Syllabus: Module Three

Aims of Module Three

- To understand higher systems control of PNEI and interaction with lower ground regulating systems (LGS)
- To understand homeostatic potential of PNEI system control and its role in overall treatment
- To apply clinically effective treatment in the inflammatory phase of disease process
- To apply Psychosomatic Treatments at mental and bioenergetic processing, by unblocking meridian obstructions

Curriculum Module 3

Psychology and mind processing events and interference with Disease process

Stress responses according to Selye's and Hammer's, and its role in disease process

Hormonal system interaction with psycho-neural and lower system levels

Immune system interaction with higher and lower systems levels

Mechanism of Inflammation, factors involved in antiinflammatory treatment

Characteristics of Inflammatory stage of disease in various systems - signs and diagnosis

Inflammation and anti-inflammatory multilevelled treatment

Bioregulatory Immune orientated treatment towards systems balance

Bioregulatory treatment in Allergies and Autoimmune disorders

Clinical Module 3

Rapport and reconditioning patients perception and consciousness

Induction and subconscious modulation and vegetative tissue responses

Distribution of the biological meridians
Signs of blockages

Treatment of the bioenergetic blockages

Understanding body kinesiological vitalistic responses

Antiinflammatory Homeotherapeutics

Instruction for bioregulatory protocols in Inflammatory phase of Diseases process

Clinical practice with the tutor supervised treatments

Prospectus Spec. Cert. BM¹⁶

Syllabus: Module Four

Aims of Module Four

- To understand the pathophysiology of the Degenerative phase of disease process - Signs and Symptoms
- To apply effective bioregulatory treatment in Degenerative conditions
- To apply Homeotherapeutics, Nutraceuticals and psychosomatic treatment in Degenerative conditions
- To apply bioregulatory treatment utilising soft tissue release techniques

Curriculum Module 4

Diagnostic parameters of degenerative conditions
 Protocols for systemic control of Ground regulation and PNEI systems
 Devising protocols of degenerative conditions incorporating Nutritional, Detoxifying and other Adjuvant therapies
 Bioregulatory protocols in Degenerative Cardiovascular disorders
 Bioregulatory protocols in Degenerative Neurological disorders

Protocols of Degenerative Gastro Intestinal disorders: Chronic gastritis, precancerous intestinal pathologies
 Degenerative respiratory conditions: Bronchiectasie, Pulmonary fibrosis, Chronic sinusitis and chronic upper respiratory tract disorders
 Chronic disorders of urogenital tract: Cystitis, Nephritis, Chronic Renal failure, Prostatitis, Precancerous UG conditions

Clinical Module 4

Distribution of the biological meridians
 Signs and treatment of blockages
 Soft and connective body release techniques - Craniosacral concept of soft tissue restrictions
 Dural and ligamentous system of tension
 Visceral restrictions and release procedures

Clinical Patients practice of Degenerative stage of disease process
 Bioregulatory protocols combining Homeotherapeutics, Detoxification, PNEI regulation and Somato-psycho bioenergetic therapies
 Bioregulatory nutrition and oxygenation & alkalinisation in Degenerative conditions

Prospectus Spec. Cert. BM¹⁷

Syllabus: Module Five

Aims of Module Five

- To understand pathophysiology of malignant phase of disease process
- To apply Homeotherapeutics in malignant conditions
- To apply advanced neuromuscular methods of Bioregulatory treatment (psychosomatic and psychovegetative treatments)
- Integration of the clinical aspect of the Bioregulatory medical protocols towards specialisation in the field of Bioregulatory Medicine
- Board Assessment of the participants in Bioregulatory Medical specialisation

Curriculum Module 5

Early Diagnosis of malignant conditions
 Devising protocols for malignancies by incorporating Homeotherapeutical, Nutritional, Detoxifying and PNEI regulating procedures in Malignancies
 Chronic disorders of Musculo-skeletal disorders
 Postural and Emotional aspect of osteomuscular system
 Revisions

Clinical Module 5

Psychovegetative treatment and practical hours
 Practical Postural and Manipulative assessment
 Bioenergetics and Somato-emotional release
 Advanced Acupuncture technique within the Bioregulatory methodology
 Practicals in Integrative Bioregulatory treatment
 Bioregulatory Ophthalmology
 Revisions

Exam and Dissertations

Exam
 Thesis presentation

General Terms and Conditions for Participants

1. Registration fees

All participants must pay the registration fee at the time of booking an event. Participants can request a reprint of their receipt and these requests will be completed immediately and sent via email.

2. Cancellation Policy

Registration cancellations must be notified in writing by fax or email to the booking agent Brauer Professional, Head Office in Adelaide (fax: 08 8379 7334 or Email: prof@brauerprof.com.au).

Cancellations received **30 business days prior to the first day of the event will receive a refund of registration fees less deposit fee and administration charge of 10% of the module fee.**

Cancellations made after 30 days and within 10 business days of the event, will receive 50% of the value of the module as a credit, to be used within 12 months from the date of the credit. Cancellations made within two business days and 'No shows' are liable for the full registration fee to be used for future modules. Must be used within 18 months.

Participants must make sure they receive an acknowledgement of their cancellation from Brauer Professional's Head Office. Only this will confirm that their request has been received and processed.

3. Liability

Brauer Professional reserves the right to amend any part of the event programme if necessary at any time. Brauer Professional will not accept liability for damages of any nature sustained by delegates or accompanying persons, or loss of, or damage to their personal property as a result of any or all events. In the event of unforeseen circumstances, Brauer Professional accepts no responsibility for loss of monies incurred by delegates. Delegates should make their own arrangements with respect to personal insurance, along with travel insurance.

4. Personal Insurance

Brauer Professional or ASBRM cannot be responsible for healthcare, dental and ambulance services during its conferences or events. Brauer Professional strongly recommends that participants take out comprehensive medical and travel insurance, which should cover the possibility of flight cancellation due to strikes and other causes. Therefore, Brauer Professional and its local co-organisers accept no responsibility of any nature whatsoever for personal injury, death, loss or damage to property or participants however caused or arising.
