

# Specialist program ( Cert. BM )

## Syllabus: Overview

### Specialist program (Module 1-4)

lectures	Module 1	Clinical Practice
<p><b>Fundamentals of Bioregulatory Medicine</b>                      Biological Systems Theory and Homeostasis                      Psychosomatisation and Disease stage process                      Presomatic Phase of Disease process                      Detoxifying Systems (Diagnosis &amp; Treatment)                      Bioregulation of the Skin, Hepatobiliary and Mucosal Systems                      Tissue Microcirculation</p>		<p><b>Principles of Bioregulatory Treatment</b>                      Bioregulatory Anamnesis                      Introduction to Homeotherapeutics                      Microcirculation and pH enhancement protocol                      Bioregulatory Detoxification procedures                      Psychosomatic Bodywork - Part One                      Psychoneurovegetative Practicals</p>
lectures	Module 2	Clinical Practice
<p><b>Bioregulatory treatment of Inflammation Phase</b>                      'PNEI system feedback'</p> <p>Bioregulation of the Psychoneurologic,                      Immune and Endocrine Systems</p> <p>Bioregulation of the Inflammatory Conditions</p> <p>Immunomodulation of Allergic and Autoimmune Conditions</p>		<p><b>Psychosomatic applied PNEI treatment</b>                      Therapeutic rapport and Patient Management                      Clinical Hypnosis and neurolinguistic programming                      Dry needling and biological meridians - Part One                      Bioregulatory Detoxifying Nutritional protocols                      Manual Lymphatic Drainage                      Homeotherapeutics in Inflammatory conditions                      Psychovegetative treatment - Part One</p>
lectures	Module 3	Clinical Practice
<p><b>Bioregulatory treatment of Degeneration Phase</b>                      Treatment principles of Degenerative Conditions                      Management of chronic Digestive, Respiratory                      and Urogenital disorders                      Gynaecological and Cardiovascular Degenerative disorders</p>		<p><b>Psychosomatic treatment at Soft Tissue level</b>                      Psychosomatic Bodywork - Part Two                      Visceral and fascial practicals                      Homeotherapeutics in Degenerative conditions                      Bioregulatory Nutrition and Antioxidant Therapy                      Acupressure and Dry needling - Part Two</p>
lectures	Module 4	Clinical Practice
<p><b>Bioregulatory Treatment of Malignant Phase</b>                      Specialised Bioregulation</p> <p>Oncology Treatment &amp; Prevention</p> <p>Disorders of Musculoskeletal and Connective Systems                      Revision</p>		<p><b>Specialised Bioregulatory techniques</b>                      Bioenergetics and Somatoemotional release                      Acupressure and Dry needling - Part Two                      Bioregulatory Ophtalmology and Dentistry                      Psychovegetative treatment - Part Two                      Homeotherapeutics in Malignancy                      Treatment protocols and strategies</p>
Specialist Exam and Thesis		

### Subspecialist (postgraduate optional module 5)

Module 5 Invasive Bioregulatory Medicine	
level 1&2 Segmental mesotherapy Bioregulatory Aesthetic Biofacelift Isopathy and Autosanguis therapy Biopuncture	level 3 available for licenced medical practitioners Oxygenation treatment (ozone and peroxide) Intravenous Alkalinisations Chelation techniques
