## Introduction

---

A warm welcome from the International Society for Bioregulatory Medicine specialisation programme, by Course Principal Dr D A Shakambet and Course Director Dr Tatyana Bosh

It gives us great pleasure to introduce joint Canadian and International Societies specialist programme for Bioregulatory Medicine, and to offer you the Diploma specialist course in the study of Bioregulatory Medicine.

This is the only course that is board certified by the Specialist Board of Bioregulatory medicine of the International Society for Bioregulatory Medicine, which maintains the same standards of Training and Competencies worldwide. The specialist register in Canada is open only to those who complete this programme and pass the specialist exam. Graduates will become board registered specialists or consultants in the Bioregulatory field of medicine.

This course is a result of years of research in the field of system medicine based on the psycho-neuro-immunology and ground-regulating systems, so that bioregulatory therapies are combined into an all systems therapy, with objectives to create responsive autoregulatory homeostasis.

Self-regulation is induced at cellular and matrix function in conjunction with higher systems and Bioregulatory Medicine reactivates redundant informational pathways by methodology based on clinical detoxification, alkalisation, microcirculation, neuro-vegetative and psychosomatic treatment, as a systems based integrative medicine towards treatment for chronic and degenerative diseases.

The International Society for Bioregulatory Medicine (Foundation for Bioregulatory Medicine) is a medical research and education charity founded in 1996 in London. The Foundation runs specialist programme in Bioregulatory Medicine by the International Society for Bioregulatory Medicine that organises courses in the UK and worldwide, in cooperation with national societies by its international team of doctors and lecturers led by the founders of the Bioregulatory Medicine, who have been refining this specialist programme over sixteen years.

## Introduction

---

The Course is presented by the International and Canadian Societies for Bioregulatory Medicine, which delivers courses under the auspices of the International Society for Bioregulatory Medicine from London, United Kingdom and Specialist Board for Bioregulatory medicine.

The 'Bio-regulatory Medicine' course is presented by a team of Physicians experienced in the theory and practice of non-suppressive medicine. The course enables prospective students to gain knowledge in the theory and clinical practice of Bioregulation and modern homeotherapeutics and nutraceuticals.

The Syllabus is a response to the need for medical training that would meet new disease distribution. Bioregulatory medicine is arising as a need for ageing populations and new toxic environmental factors, with a prevalence of chronic and degenerative disorders, and ever-increasing incidence of malignant diseases.

Contrary to the therapy based on singular aetiological cause (reductionist view), the bioregulatory treatment aims to restore multiple homeostasis systems, and treats a disease as an imbalance of the homeostasis within the biological systems. Homeostasis is a dynamic and adaptive, and automated feedback mechanism., with a capacity to set off healing potential of the human organism.

This methodology observes health as a dynamic process in time and space, organised as an open feedback system. Bioregulatory medicine diagnoses imbalance at every level, be it physical, psychological or spiritual, in order to enable bioinformation flow.

This course teaches Environmental medicine and ways of regulating homeostasis by removing underlying tissue micro toxicity. Non-suppressive treatment is facilitated by means of a bio-regulatory approach, combining Clinical Ecology, Nutrition, Bioenergy, Homeopathy, Bioresonance and Psychosomatic treatments. The therapeutic potential of homeopathy is utilised as a Nanopharmaceuticals, targeting faulty homeostatic feedback loop and re-establishing its original informational flow.

## Background Information

---

Lecturing academic board of International team of Doctors, who are lecturers and tutors. The teaching centre is 'Academy for Bioregulatory Medicine', which is attached to the 'International Society for Bioregulatory Medicine' and delivers specialist programme Canadian Society for Bioregulatory Medicine that board certifies specialist in the field of Bioregulatory Medicine.

## Course Aims and Objectives

The Course Syllabus contains an Integrative program of therapies that deals with multifactorial and multilevelled aspects of disease process. This Prospectus is focused on the Diploma in Bioregulatory medicine with adjuvant therapies.

The adjuvant therapies are integrated into a bioregulatory protocol of Clinical Ecology, Nutrition, Environmental medicine, Homeotherapeutics and Psycho-therapeutic disciplines.

This Prospectus outlines the course details of the Specialist Certification in Bioregulatory medicine with Homeotherapeutics (Spec. Cert. BMUK London and Canada).

The Course aims to provide a training 'in-house' with self-study and work assignments, containing sufficient 'need to know' subject material and practice methodology to enable successful candidates to prescribe their modality (therapeutic discipline) of Bio-regulatory medicine and Homeotherapeutics.

The prospective students will be able to practice Bioregulatory Medicine and prescribe Homeotherapeutics in a manner, which is as follows:

- ethical
- safe-minimal side effects
- effective
- best practice

To provide teaching facilities for candidates to achieve Canadian and United Kingdom practice standards to enable them to be accepted on to the Specialist Register and other medical Registers in the UK and Canada (i.e. register for natural & complementary medicine UK, Canada Specialist Register for BM)

To teach students sufficient Bio-regulatory Medical Sciences, Complex Homeopathy, Homotoxicology, all known as Homeotherapeutics, in addition to General Diagnostics to ensure the above aims

To provide adjunct ancillary reading resources, work assignment and adequate standards of assigned case history to bring learning and attainment within the guidelines as laid down by the National Occupational Standards for the self-regulating body

# Prospectus Spec. Cert. BM 4

## Training standards and Competencies

### Bioregulatory Medicine Training Standards

Standards of Competencies and Specialisation are regulated by the Specialist Board at ISBM (SBBM) that sets specialisation standards in Bioregulatory Medicine, required towards joining specialist register of Canadian Society for Bioregulatory Medicine.

- To receive adequate structured 'in-house' and guided 'Self-study' teaching, and supported Learning Guidelines in covering the syllabus parameters to achieve the aims of the Course
- To be aware of tutor support facilities, administrative support facilities and their easy and regular availability; each student will have a designated 'Personal Tutor'
- To receive comprehensive teaching in a consistent style of approach, with continuous assessment procedures, together with attainment monitoring, and total guidelines of subject knowledge, methodology and 'need to know' parameters
- Specialist training lasts one year of combined theory and practical application of bioregulatory modalities, according to the educational programme set by SBBM (programme is continually updated with a new research in the field)
- Required standard to all national register thus warrant continual professional education and maintaining high level of practice for bioregulatory specialists within the specialist register.
- Requirement for taking the specialist course are outlined in the curriculum document, comprising previous medical undergraduate education; medical or veterinary doctors, naturopathic doctors or complementary practitioners with long experience in the complementary field leading to approval by the national society register for undertaking specialisation.

# Prospectus Spec. Cert. BM <sup>5</sup>

## Training Standards and Competencies

- Specialisation is completed by passing board certified exam and thesis that is implemented by national register in cooperation and supervision by the SBBM, who is issuing a final specialist certificate as a requirements to join specialist register of a national body

### Bioregulatory Medicine Specialist Competencies

- Taking Bioregulatory anamnesis of correlative psycho-mental and physiological systems signs of imbalance (dis-ease)
- Diagnose according to parameters of disease progression and multifactorial aetiology, in addition to laboratory tests (see below) that corroborate faulty homeostatic system(s) involved in pathogenesis
- Bioregulatory diagnostic laboratory tests, as described in specialist coursebook, are interpreted on the basis faulty homeostatic system (basic blood tests, vitamins, minerals, antioxidants, allergy/sensitivity tests, hormonal, neurotransmitters profile tests and similar assessments)
- Bioregulatory therapeutical protocol is comprised according to the training programme, based on balancing higher and lower systems levels and removing systems' dysregulation factors.
- Bioregulatory competencies include treatment of detoxification, prescription of nutraceuticals, homeotherapeuticals and adjuvant therapies as described in specialist coursebook
- Bioregulatory training competencies include bodywork techniques; psychosomatic bodywork and neurovegetative treatment
- Bioregulatory invasive treatments are subspecialist disciplines outside main programme, that requires subspecialist training within the fifth module and includes: segmental mesotherapy, dry needling and bio-puncture

*Subspecialist invasive bioregulatory therapies, which requires additional subspecialist training are depicted in Module 5 of post specialist continual professional training  
Specialist on register also must comply with the national regulations set out by their appropriate regulating body*

# Prospectus Spec. Cert. BM<sup>6</sup>

## Training Standards and Competencies

---

### Bioregulatory Medicine Specialisation Objectives

- Promote integrative, cost effective and gentle, causative treatment suited for prevalence of chronic, degenerative and malignant disorders of modern times
- To create training as a reflection of multi-levelled patients function, be it psychosomatic, bioenergetic-vitalistic, nutritional or environmental
- Update concept of linear and unifactorial ICD classification of disease, toward system-orientated multifactorial protocols
- Introduce system biology and concept of probability of morbid parameters algorithm and introduce concept of dysregulatory factors in order to enable diagnosis and treatment of homeostatic self-regulation
- Update pharmacology with homeotherapeutical concept of minimal dosage, away from side-effect prone medication
- Substantially diminishes need for an aggressive type of pharmacological treatments and decrease iatrogenic effects
- Introduce preventative and presomatic diagnosis and treatment in order to halt disease process at the early formative stages
- Diagnosis and treatment of unclassified medical conditions, with mixed (multisystem) clinical pictures
- Identifies subtle but cumulative environmental factors of disease, and introduce environmental medicine into main stream
- Complementary and conventional techniques merged into unified Integrated treatment within the personalised programme
- Reflective practice and continual professional development
- An understanding of patients' physical, emotional, bioenergetic and ever evolving inner awareness of spiritual needs
- Patients' opportunity to transform the illness crises into the personal growth and balance

## Course Methodology

---

### ■ Course Prerequisites

- a) Complete Application Form and forward fees
- b) Obtain obligatory textbooks
- c) Course Manual will be handed at each course date
- d) Complete Background reading and precourse modules
- e) Commence reading, study and submit to Tutorial Desk the obligatory Work Assignments
- f) Attend all in house lectures, submit all Work Assignments and Case Histories by the due date as noted in each Course Manual
- g) Fulfill all obligations and submission of assignments and case management studies completion. The Examination entry form will be forwarded.

### ■ Course Manual

The Course Manual provides:

- a) Dates, timing and key summaries of all lectures
- b) Obligatory textbook and reference pages to lectures
- c) Addition to textbooks and lectures 'need to know' subject material
- d) Background reading parameters and guidelines
- e) Work Assignments and 'completion to standard' guidelines
- f) Case Management Studies - presentation parameters

### ■ Course Policy

Course Policy stipulates the obligatory aspects of the course described in the text hitherto; no sound recording or video recording allowed, no mobile phones; aim to arrive 5 minutes before lecture timings; work assignments submitted on due dates.

## Academic Resources

---

The Course provides a training 'in-house' with self-study and work assignments, to enable successful candidates to practice Bioregulatory medicine at specialist level with capacity to prescribe Homeotherapeutics and seek out laboratory testings as described in Course handbook.

The course consists of modules, as described in the Course Syllabus, of the Prospectus, which consists of the following:

In house lecture at the Canadian Academy presented in modular units during the course of one academic year

10 course works, including cases studies, that constitute thesis, presented at the end of the course comprising 20,000 words

Self study and pre-reading material for the course

Distant tutorial arranged with their allocated tutor in and at the venue of the course

Final written exam with presentation of Dissertation (Thesis)

Continual Professional Development after graduation conducted by the International Society of Bioregulatory Medicine from London

### Coursework

During the course, ten course-works are assigned. Each work consists of 2,000 words or 20,000 words in total.

During completion of the coursework students are under guidance and supervision of the allocated tutor.

### Thesis

Thesis is completed by aforementioned thesis made up of coursework assignments. Thesis consists of oral viva by public presentation, as a part of overall course assessment (see evaluation and exam).

## Evaluation and Exam

---

### Examination Entry Parameters

Candidates must complete the examination entry form and submit it 28 days prior to the scheduled exam date. Entry to Examination is permitted only after the satisfactory completion of the course together with Work Assignments and Coursework.

### Qualifying Examination Parameters

■	Pass	60%
	Credit	70%
	Honours 2nd.	80% (1st class >91%)

### Attendance, Course Work and Home Work

■ Attendance, Course Work with Thesis attract 50% possible marks

■ The Examination attracts the balancing 50% marks

*Completion of Course work and full attendance is obligatory. Re-sit students must undertake the whole examination after a minimum period of 3 months.*

### Qualification specialist title (Board certified Specialist, Consultant)

Qualification and Specialist Board is a part of the Canadian Society for Bioregulatory Medicine, as an independent Board managed by the International Society for Bioregulatory Medicine that maintains Training standards and Competencies in Bioregulatory Medicine worldwide

■ Successful candidates gain Certification Specialisation (Cert. Spec./DipBMUK), and are granted specialisation by the Specialist Board, and become eligible to join specialist registers in CSBM, ISBM and MBRCP .

Designation letters are: **MCSBM board registered specialist (Can.)**  
**MISBM board registered specialist (Intl.)**

■ Following clinical years and evaluation by the Specialist Board, which holds discretionary right to award the highest level of Consultancy excellence in Bioregulatory medicine in Clinical Practice:

Designation letters are: **Consultant MCSBM**

■ Specialist Board may also grant for excellence in research, education, clinical practice as well as honorary Fellowship of the Canadian and International Societies:

**FCSBM, FISBM**

## Evaluation and Exam

---

### Exam

Evaluation consists of Exam papers and completion and public presentation of Thesis.

The Exam consists of two parts; first part is made up of two essays and second part consists of short answers type of exam paper.

#### **Part one - essay type answers (25% of total marks)**

Two questions are to be answered in 2 hours

a) 1 question – Bioregulation/Homeostasis (choice of two questions)

b) 1 question - Homeotherapeutics (choice of two questions)

#### **Part two - short type answers (25% of total marks)**

Questions to be answered in a duration of 1 hour and 15 minutes

a) short answer questions (20)

#### **Part three - Course work and Thesis (50% of total marks)**

The Dissertation is a text of course work of 20,000 words, which is presented in public

## General Informations: Dates

### Course Dates

The course runs in precourse module one and four specialist modules; Each module lasts five in-house days of teaching and practicals.

The course also consists of webinars, between in house modules and tutorial for coursework.

The final exam and evaluation is scheduled after completed modular programme .

Module	Course dates 2016/17	
One		16-20 May 2016
Two	Lecture & <i>clinical practice</i>	26-30 September 2016
Three		16-20 January 2017
Four		10-14 April 2017
ASSESSMENT		Dissertation presentation Exam

## General Information: Timetable and Enrolment

### Module Timetable

Each teaching days is divided into four sessions, with short break in between, and lunch break between 13:00 and 14:00.

Session I	tea break	session II
<b>10:00 – 11:15</b>	11:15-11:30	<b>11:30 - 13:00</b>
lunch break 13:00 - 14:00		
Session III	tea break	session IV
<b>14:00 – 15:30</b>	15:30-15:45	<b>15:45-17:00</b>

Applications are now being invited for the specialist Postgraduate Course Membership Programme.

Successful applicants will be informed in written form about the Course place, precourse reading and in some cases an interview will be arranged to guide student, prior to the Course commencement.

To apply for the Course, please fill in the application form that can be downloaded from the ISBM website ([www.bioregmed.com](http://www.bioregmed.com)) or in the last page of the Prospectus and send it to registrar together with:

- a) Your curriculum vitae including relevant professional development undertaken
- b) Application Form and
- c) Course Fee

Any deposit payment will be fully reimbursed for unsuccessful applicants. If you are awarded a place and you enrolled to the Course, the Fee is refundable up to three months prior to the start of the course, less 10% administration fee.

**Fill in application on the last page of the Syllabus and forward it with payment to the Registrar**

## Syllabus: Overview

### Specialist program (Module 1-4)

lectures	Module 1	Clinical Practice
<p><b>Fundamentals of Bioregulatory Medicine</b>            Biological Systems Theory and Homeostasis            Psychosomatisation and Disease stage process  <b>Presomatic Phase of Disease process</b>  <b>Detoxifying Systems (Diagnosis &amp; Treatment)</b>            Bioregulation of the Skin, Hepatobiliary and Mucosal Systems            Tissue Microcirculation</p>		<p><b>Principles of Bioregulatory Treatment</b>            Bioregulatory Anamnesis            Introduction to Homeotherapeutics            Microcirculation and pH enhancement protocol            Bioregulatory Detoxification procedures            Psychosomatic Bodywork - Part One            Psychoneurovegetative Practicals</p>
lectures	Module 2	Clinical Practice
<p><b>Bioregulatory treatment of Inflammation Phase</b>  <b>'PNEI system feedback'</b></p> <p>Bioregulation of the Psychoneurologic,            Immune and Endocrine Systems</p> <p>Bioregulation of the Inflammatory Conditions</p> <p>Immunomodulation of Allergic and Autoimmune Conditions</p>		<p><b>Psychosomatic applied PNEI treatment</b>            Therapeutic rapport and Patient Management            Clinical Hypnosis and neurolinguistic programming            Dry needling and biological meridians - Part One            Bioregulatory Detoxifying Nutritional protocols            Manual Lymphatic Drainage            Homeotherapeutics in Inflammatory conditions            Psychovegetative treatment - Part One</p>
lectures	Module 3	Clinical Practice
<p><b>Bioregulatory treatment of Degeneration Phase</b>            Treatment principles of Degenerative Conditions            Management of chronic Digestive, Respiratory            and Urogenital disorders            Gynaecological and Cardiovascular Degenerative disorders</p>		<p><b>Psychosomatic treatment at Soft Tissue level</b>            Psychosomatic Bodywork - Part Two            Visceral and fascial practicals            Homeotherapeutics in Degenerative conditions            Bioregulatory Nutrition and Antioxidant Therapy            Acupressure and Dry needling - Part Two</p>
lectures	Module 4	Clinical Practice
<p><b>Bioregulatory Treatment of Malignant Phase</b>  <b>Specialised Bioregulation</b></p> <p>Oncology Treatment &amp; Prevention</p> <p>Disorders of Musculoskeletal and Connective Systems            Revision</p>		<p><b>Specialised Bioregulatory techniques</b>            Bioenergetics and Somatoemotional release            Acupressure and Dry needling - Part Two            Bioregulatory Ophtalmology and Dentistry            Psychovegetative treatment - Part Two            Homeotherapeutics in Malignancy            Treatment protocols and strategies</p>
Specialist Exam and Thesis		

### Subspecialist (postgraduate optional module 5)

Module 5 Invasive Bioregulatory Medicine	
<p><b>level 1&amp;2</b>            Segmental mesotherapy            Bioregulatory Aesthetic Biofacelift            Isopathy and Autosanguis therapy            Biopuncture</p>	<p><b>level 3</b>  <b>available for licenced medical practitioners</b>            Oxygenation treatment (ozone and peroxide)            Intravenous Alkalinisations            Chelation techniques</p>

## Syllabus: Module One

Aims of Module One
To expand medical pathophysiology to the scientific basis of Homeostasis and Systems theory
To understand process oriented and system approach of ethiopathogenesis in a context of homeostatic autoregulatory feedback mechanism
To clinically apply nanopharmaceuticals and detoxifying therapies
Understanding of the Bioregulatory protocols and Somato-Psycho-Energetic process

Curriculum Module 1	
<p>Systems Theory in medicine</p> <p>Chronological stages of Disease evolution</p> <p>Presomatic Syndromes</p> <p>Psychosomatic Process</p> <p>‘Hippocrates to Hahnemann’ and Homeotherapeutical prescription</p> <p>Present day Nanoscience - theory of minimal dosage (Classical and PNEI)</p>	<p>Biofeedback mechanism in reference to spiritual, mental-emotional inference to health and pathology</p> <p>Non-linear thermodynamics, and multifactorial algorithm as a probability of disease and cure</p> <p>Bioregulation of the lower ground systems: Tissue Acidity and Microcirculation</p> <p>Bioregulatory therapy and diagnostics of the Mucosal detoxifying systems</p>

Clinical Module 1
<p>Bioregulatory Diagnostic procedures on different levels: psycho-neuro-immuno-endocrine and electro-magnetic cellular communication (electrophysiology)</p> <p>Taking patient Bioregulatory medical history in unison between disease progression and psychological vitalistic anamnesis</p> <p>Applied Bioregulation and Patients Management; creation of the Bioregulatory medical treatment Protocols</p> <p>Bioregulatory detoxifying procedures and maintaining homeostasis parameters (matrix pH, microcirculation, vegetative neurovascular parameters)</p>

## Syllabus: Module Two

Aims of Module Two
To understand higher systems control of PNEI and interaction with lower ground regulating systems (LGS)
To understand homeostatic potential of PNEI system control and its role in overall treatment
To apply clinically effective treatment in the inflammatory phase of disease process
To apply Psychosomatic Treatments at mental and bioenergetic processing, by unblocking meridian obstructions

Curriculum Module 2	
<p>Psychology and mind processing events and interference with Disease process</p> <p>Stress responses according to Selye's and Hammer's, and its role in disease process</p> <p>Hormonal system interaction with psycho-neural and lower system levels</p> <p>Immune system interaction with higher and lower systems levels</p>	<p>Mechanism of Inflammation, factors involved in antiinflammatory treatment</p> <p>Characteristics of Inflammatory stage of disease in various systems - signs and diagnosis</p> <p>Inflammation and anti-inflammatory multilevelled treatment</p> <p>Bioregulatory Immune orientated treatment towards systems balance</p> <p>Bioregulatory treatment in Allergies and Autoimmune disorders</p>
Clinical Module 2	
<p>Rapport and reconditioning patients perception and consciousness</p> <p>Induction and subconscious modulation and vegetative tissue responses</p> <p>Distribution of the biological meridians Signs of blockages</p> <p>Treatment of the bioenergetic blockages</p>	<p>Understanding body kinesiological vitalistic responses</p> <p>Antiinflammatory Homeotherapeutics</p> <p>Instruction for bioregulatory protocols in Inflammatory phase of Diseases process</p> <p>Clinical practice with the tutor supervised treatments</p>

## Syllabus: Module Three

Aims of Module Three
To understand the pathophysiology of the Degenerative phase of disease process - Signs and Symptoms
To apply effectively bioregulatory treatment in Degenerative conditions
To apply Homeotherapeutics, Nutraceuticals and psychosomatic treatment in Degenerative conditions
To apply bioregulatory treatment utilising soft tissue release techniques

Curriculum Module 3	
<p>Diagnostic parameters of degenerative conditions</p> <p>Protocols for systemic control of Ground regulation and PNEI systems</p> <p>Devising protocols of degenerative conditions incorporating Nutritional, Detoxifying and other Adjuvant therapies</p> <p>Bioregulatory protocols in Degenerative Cardiovascular disorders</p> <p>Bioregulatory protocols in Degenerative Neurological disorders</p>	<p>Protocols of Degenerative Gastro Intestinal disorders: Chronic gastritis, precancerous intestinal pathologies</p> <p>Degenerative respiratory conditions: Bronchiectasie, Pulmonary fibrosis, Chronic sinusitis and chronic upper respiratory tract disorders</p> <p>Chronic disorders of urogenital tract: Cystitis, Nephritis, Chronic Renal failure, Prostatitis, Precancerous UG conditions</p>
Clinical Module 3	
<p>Distribution of the biological meridians</p> <p>Signs and treatment of blockages</p> <p>Soft and connective body release techniques - Craniosacral concept of soft tissue restrictions</p> <p>Dural and ligamentous system of tension</p> <p>Visceral restrictions and release procedures</p>	<p>Clinical Patients practice of Degenerative stage of disease process</p> <p>Bioregulatory protocols combining Homeotherapeutics, Detoxification, PNEI regulation and Somato-psycho bioenergetic therapies</p> <p>Bioregulatory nutrition and oxygenation &amp;alkalinisation in Degenerative conditions</p>

## Syllabus: Module Four

Aims of Module Four
To understand pathophysiology of malignant phase of disease process
To apply Homeotherapeutics in malignant conditions
To apply advanced neuromuscular methods of Bioregulatory treatment (psychosomatic and psychovegetative treatments)
Integration of the clinical aspect of the Bioregulatory medical protocols towards specialisation in the field of Bioregulatory Medicine
Board Assessment of the participants in Bioregulatory Medical specialisation

Curriculum Module 4
Early Diagnosis of malignant conditions Devising protocols for malignancies by incorporating Homeotherapeutical, Nutritional, Detoxifying and PNEI regulating procedures in Malignancies Chronic disorders of Musculo-skeletal disorders Postural and Emotional aspect of osteomuscular system Revisions
Clinical Module 4
Psychovegetative treatment and practical hours Practical Postural and Manipulative assessment Bioenergetics and Somatoemotional release Advanced Acupuncture technique within the Bioregulatory methodology Practicals in Integrative Bioregulatory treatment Bioregulatory Ophthalmology Revisions
Exam and Dissertations
Exam Thesis presentation

## Syllabus: Invasive Bioregulatory Module 5

### Aims of Module Five

To expand clinical application of the Bioregulatory Medicine to Invasive methodology

To train medical practitioners parenteral application of Homeotherapeutics, Antioxidants, Chelating and Alkalinising agents

To clinically apply nanopharmaceuticals by intramuscular and parenteral routes

Continual profesisonal development in subspecialist Bioregulatory treatments

### Clinical Module 5

#### Invasive Bioregulatory methods

##### Level 1

Bioregulatory Aesthetic "Biofacelift"

Biopuncture

Homeosiniatry/homeopuncture

##### Level 2

Segmental Mesotherapy

Isopathy and Autosanguis therapy

##### Level 3

Basic Stem cell regenerative treatments "PRP"

Oxygenation treatment

Ozone and Hydrogen peroxide application

##### Level 4

Intravenous alkalinisation

Chelation techniques

Advanced Stem cell therapies

### Invasive Bioregulatory methods

#### **15. Biopuncture in General Practice**

Dr KERSSCHOT, JAN, Inspiration Publishing 2004  
ISBN: 90-802503-76

## General Terms and Conditions for Participants

---

### 1. Registration fees

All participants must pay the registration fee at the time of booking an event. Participants can request a reprint of their receipt and these requests will be completed immediately and sent via email.

### 2. Cancellation Policy

Registration cancellations must be notified in writing by fax or email to the booking agent.

Cancellations received **30 business days prior the first day of the event will receive a refund of registration fees less deposit fee and administration charge of 10% of the module fee.**

Cancellations made after 30 days and within 10 business days of the event, will receive 50% of the value of the module as a credit, to be used within 12 months from the date of the credit.

Cancellations made within two business days and 'No shows' are liable for the full registration fee to be used for future modules. Must be used within 18 months.

Participants must make sure they receive an acknowledgement of their cancellation.

### 3. Liability

ISBM reserves the right to amend any part of the event programme if necessary at any time. ISBM will not accept liability for damages of any nature sustained by delegates or accompanying persons, or loss of, or damage to their personal property as a result of any or all events. In the event of unforeseen circumstances, ISBM accepts no responsibility for loss of monies incurred by delegates. Delegates should make their own arrangements with respect to personal insurance, along with travel insurance.

### 4. Personal Insurance

ISBM cannot be responsible for healthcare, dental and ambulance services during its conferences or events. ISBM strongly recommends that participants take out comprehensive medical and travel insurance, which should cover the possibility of flight cancellation due to strikes and other causes. Therefore, ISBM and its local co-organisers accept no responsibility of any nature whatsoever for personal injury, death, loss or damage to property or participants however caused or arising.

# DIPLOMA COURSE APPLICATION

## BIOREGULATORY MEDICINE

Please note that all applications are subject to review and acceptance by the Academy Board.

The International Society for Bioregulatory Medicine

### 1. General details

\*Required

\* Full name

\* Clinic/Hospital/Surgery (if appropriate)

\*Address

\* Postal address (if different from above)

\*Phone

Fax

Mobile

Email

### 3. Medical Experience

\* Describe type of practice and duration
